

DEEP R. THUMMAR

Senior .NET Developer | .NET Core | C# | .NET MVC | SQL Server | React.js

+91-6355489829 | deepthumar224@gmail.com | Gondal, Gujarat (Willing to Relocate)

PROFESSIONAL SUMMARY

Senior Full Stack Developer with over 4.5 years of experience building enterprise-grade backend systems and scalable, cloud-native web applications using C#, ASP.NET Core, React.js, Node.js, and Microsoft SQL Server. Proven expertise in independently managing end-to-end project lifecycles, translating complex business requirements into robust technical solutions for non-technical clients, and optimizing database performance. Strong grounding in Object-Oriented Programming, Data Structures & Algorithms, design patterns, RESTful APIs, and Microservices, with hands-on Microsoft Azure experience and a track record of quickly ramping up on new. Delivered scalable, production-ready features with measurable business impact across ERP, travel tech, gaming, and retail domains.

TECHNICAL SKILLS

- **Backend:** C#, ASP.NET Core, ASP.NET MVC, ASP.NET Zero, ADO.NET, Web API, RESTful APIs, Microservices, Entity Framework Core, LINQ, Node.js
- **Frontend:** JavaScript, TypeScript, React.js, Angular.js, HTML5, CSS3, jQuery.
- **Databases:** Microsoft SQL Server, MySQL, PostgreSQL
- **Cloud & DevOps:** Microsoft Azure, Azure Blob Storage, Azure DevOps (ADO), Git, GitHub, AWS (Beginner)
- **Reporting Tools:** DevExpress, Crystal Reports, Open XML (Dynamic Chart Generation)
- **Other:** Agile/Scrum, Code Review, Team Leadership, Technical Mentorship, OOP, Data Structures & Algorithms, Design Patterns (Repository, Factory, Singleton), RESTful API & Microservices Design

PROFESSIONAL EXPERIENCE

RebbitWeb Technologies LLP, Rajkot - Senior Software Developer [04/2025 – 07/2026]

Digital solutions studio — enterprise web apps, custom e-commerce platforms, and digital experiences.

- Managed end-to-end development lifecycles independently, translating complex client requirements into scalable technical architectures and ensuring timely delivery of production features.
- Executed complex database and backend migrations, including transitioning legacy VB.NET desktop applications and MS SQL databases to modern NestJS and PostgreSQL REST architectures.
- Developed and deployed enterprise web applications using ASP.NET Zero, ASP.NET Core, and C# MVC integrated with Microsoft SQL Server for diverse business workflows.

- Engineered a real-time Game API using NestJS and MySQL, designed to handle high-frequency concurrent user requests and complex game-state logic
- Participated in Agile/Scrum sprints, architecture reviews, and cross-functional collaboration to deliver multiple production features on schedule.

Key Projects:

- **MyHuddle (Angular, .NET Core API):** Full-stack web application integrating a dynamic Angular frontend with a robust .NET Core API for seamless user interaction and data management.
- **BT-SOFT (ASP.NET Zero, MS SQL Server):** Enterprise management platform with multi-module CRUD, role-based access control, and reporting dashboards.
- **Petrol Pump Management System (ASP.NET Core, MS SQL Server):** Full-stack station management system for inventory tracking, pump operations, and automated sales reporting.
- **Game API (Node.js, NestJS, MySQL):** Scalable RESTful API for a multiplayer gaming platform with stateless endpoints supporting concurrent real-time sessions.
- **Old-Age-MS Desktop App:** Developed comprehensive management and desktop solutions for efficient record-keeping, localized operations, and internal business workflows.

Infinity Infoway Limited, Rajkot - Senior Software Developer | Technical Lead [09/2021 – 02/2025]

IT services firm — ERP/CRM, university campus management, and travel booking engines.

- Architected and delivered scalable C# ASP.NET MVC and .NET Core applications across ERP, travel booking, and campus management domains, serving enterprise clients at scale.
- Modernized the frontend architecture of the travel booking engine by migrating multiple legacy UI pages to React.js, building dynamic, reusable, and highly responsive components.
- Engineered JWT and OAuth2 authentication and authorization across distributed services, securing API endpoints with role-based access control and stateless token validation.
- Optimized database performance and significantly reduced data fetching time by refactoring legacy stored procedures, implementing strategic indexing, restructuring complex SQL joins, and resolving N+1 query issues in Entity Framework.
- Processed 10,000+ records efficiently using parallel processing and optimized LINQ queries, eliminating bottlenecks in data-heavy enterprise reporting modules.
- Integrated Azure Blob Storage for scalable, secure document and media management across multiple enterprise application modules.
- Engineered an automated daily data synchronization pipeline between internal systems and client SAP infrastructure, eliminating manual data transfer and reducing operational errors.
- Led a 5-member cross-functional development team to deliver a critical product release 2 weeks ahead of schedule through Agile sprint planning, risk management, and structured task delegation.

Key Projects:

- **Bus Booking Engine (C#, ASP.NET MVC, ASP.NET Core, React.js, SQL Server, Azure):** End-to-end travel booking platform with real-time seat availability, payment gateway integration, and multi-operator management deployed on Microsoft Azure.

EDUCATION

Master of Science (M.Sc.) — Information Technology

2021 – 2023

Shree Matrumandir Group of Colleges | Rajkot, Gujarat

Bachelor of Science (B.Sc.) — Information Technology

2018 – 2021

Atmiya Institute of Technology & Science | Rajkot, Gujarat

INDUSTRY DOMAIN EXPOSURE

- Travel & Transportation
- Retail & Energy Management
- Gaming & Entertainment
- Enterprise ERP / CRM Solutions
